### Something strange falls from the sky

Mikayla Shears was riding her horses across the fields at the farm where she and her parents live in Australia last November, when she saw something very strange on the ground. "At first I was afraid to touch it!" She said. "I thought something may jump out of it!". It was 22 kilo ball made of lots of different metal parts.

Mikayala called her dad and he came in a truck and drove it back to the farmhouse. People don't drive hundreds of miles across the dessert area to leave a metal ball in the middle of a field. "It dropped form above!" He said. "I was sure of that!"

Mikayala's father emailed a photo of the ball to the Planet Museum. He was told that the ball was possibly part of a rocket. Two days earlier a rocket was used to fly an american satellite into space to study the sun. Most of it fell into the sea after the satellite was safely in space, but maybe this part didn't.

"I know a lot about cows and sheep", Mikayala said, "but I don't know anything about rockets. I want to find out more about them now. Perhaps I'll be an astronaut one day!"
